Sudbury is the most populated city in Northern Ontario, and the largest in all of the province by land area. The city offers travellers a host of unique experiences that include outdoor adventures, as well as more city-inspired fare.

With easy access to the Great Outdoors, world-class attractions, first-class dining and accommodations, Sudbury makes for a great destination no matter what your passions are.

## HISTORY

Sudbury was founded following the discovery of vast deposits of nickel ore during the time the transcontinental railway was near completion. Soon after, the city became known as a world leader in nickel mining. In fact, mining and related industries dominated its economy for much of the 20th century.

Sudbury has gone on to expand from a resource-based economy to emerge as the major retail, economic, health and educational centre for Northeastern Ontario. Greater Sudbury was formed in 2001 when the Regional Municipality of Sudbury and several other townships were merged.

## SCIENCE NORTH

Located just south of the city's downtown core on the shores of Ramsey Lake, Science North offers a host of interactive exhibits and shows including an IMAX 3D theatre, Planetarium, Vale Cavern, and a glass-enclosed Butterfly Gallery. If you really want to get your hands on science, drop by the Nature Exchange where you research "wild" items and earn points that can be used towards buying natural artifacts. You can also cut, grind and polish rocks at the Lapidary Lab.
